## OBJECTIVE

To combine my ENTC background with strong software skills to build smart, integrated tech solutions in IoT and automation.

## EDUCATION

|                                                                                                              |                              |
|--------------------------------------------------------------------------------------------------------------|------------------------------|
| <b>Savitribai Phule Pune University</b><br>Bachelor of Engineering in E and TC Engineering, CGPA: <b>8.7</b> | Pune, India<br>2022 - 2026   |
| <b>Vidya Prathisthan Science College, Baramati</b><br>12 <sup>th</sup> (HSC)    Percentage: <b>71%</b>       | Pune, India<br>2020 - 2022   |
| <b>Chh. Shivaji High School</b><br>10 <sup>th</sup> (SSC)    Percentage: <b>94.20%</b>                       | Satara, India<br>2014 - 2020 |

## SKILLS

- **Programming Languages :**      JAVA, HTML, CSS, JAVASCRIPT
- **Database:**                          MySQL, MONGO DB
- **Tools:**                                VS Code
- **Soft Skills:**                        Organizational Skills, Communication Skills, Analytical Skills, Presentation Skills

## PROJECTS

### IoT-Based Biometric Attendance System

- The objective is to build a fingerprint-based IoT attendance system with real-time tracking.
- Developed the system using ESP8266 and OLED display for local user feedback.
- Integrated with a custom web portal for real-time attendance management and Excel export.
- Gained experience in biometric authentication, IoT integration, and data reporting.

### Arduino-Based Home Security System

- The objective is to design a laser-based intrusion detection and alert system.
- Used Arduino and LDR sensors to detect beam interruption as a security trigger.
- Implemented real-time SMS/app notifications to alert users of unauthorized access.
- Learned to develop cost-effective, responsive home security solutions.

## INTERNSHIPS

### Embedded Systems Intern, Namrata Automation Pvt. Ltd. – Pune      December 2024 – June 2025

- Worked on embedded systems development and HMI (Human Machine Interface) integration for industrial applications.
- Gained practical experience with microcontrollers, sensors, relays, and essential electronic components.
- Involved in assembling, testing, and troubleshooting industrial automation panels for real-time deployment.

## CERTIFICATIONS

### Web Development Certification – SkillCraft Technology

Completed training in front-end technologies: HTML, CSS, JavaScript, and responsive design.  
Built multiple interactive web projects with a focus on clean layout and user experience

### Java Programming Internship – InternPe

Completed internship focused on core Java programming concepts such as OOP, collections, and exception handling.  
Worked on Java-based mini projects to apply and enhance backend development skills..
